

# MAC Newsletter May 2025

May brings with it the push to get everything ready for the summer season. The MAC is starting to shape up and we're doing everything we can to get the property all set by the end of the month. Throughout the month we will be out and about working on the pools, golf course, and nature trail to have them ready to go by Memorial Day Weekend. The fitness center has remained very busy, golf and tennis activity has picked up, and the pool is scheduled to open on May 24th\*. Summer is just around corner and we hope that you are able to enjoy the last full month of spring with us here at the MAC. Please be mindful of increased traffic and small children once the pool opens later this month! We welcome all of our new MAC Members and hope that you are working diligently towards your wellness goals and/or enjoying general recreation opportunities here on our campus.

Aaron Greenwell  
Executive Director

\*The Pool opening date is contingent on all of our contractors completing work on-time. The new surge tank project HAS BEEN inspected by the state and we're waiting for the concrete work to be completed.

### Aquatics

The tentative opening day for the pool to open is Saturday May 24th. As stated above, this is subject to change based on pool construction and weather conditions. We are excited for the 2025 season and also are very happy to have a great staff in the aquatics area. Please welcome back Ann Rogers and Noah Miller as the head lifeguard and assistant head lifeguard.

### Board Members

The MAC welcomed newly appointed board member Quin Lynch at the April Board Meeting. We look forward to adding Quin's insight to our board of directors.

### River Trace Golf

If you haven't been on the golf course lately it's come a long way in just a few weeks. Our greens are healthy, firm, and fast. The new sand we've put in the bunkers plays nicely, and the bluegrass fairways are in amazing shape. Please be mindful of our staff's safety if you are on the course while they are actively engaged in a maintenance task.
